Charlotte Harbor: The Lifeblood of our Environment

Tuesday, October 21, 2025

10:00 AM

Explore how our local ecosystem works—and what threatens it. From red tide and seagrass loss to water quality concerns, you'll gain insight into the challenges facing our waterways.

You'll have the opportunity for a hands-on water quality testing experience.

Discover practical steps we can all take to help restore and protect this vital natural resource.

This event is included with general admission to the Garden
